-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 03 March 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-31 are rejected under 35 U.S.C. 101 as not falling within one of the four statutory categories of invention. While the claims recite a series of steps or acts to be performed, a statutory “process” under 35 U.S.C. 101 must (1) be tied to another statutory category (such as a particular apparatus), or (2) transform underlying subject matter (such as an article or material) to a different state or thing. The instant claims neither transform underlying subject matter nor positively tie to another statutory category that accomplishes the claimed method steps, and therefore do not qualify as a statutory process.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 25 are rejected under 35 U.S.C. 102(b) as being anticipated by Dorfel et al. (hereinafter “Dorfel”, CA 2436596 A1).

Regarding claim 1, Dorfel describes a method for the simulation of spatial visual impressions (claim 1 lines 1-23), comprising the following steps:

a) specifying the image generator geometry of an image generator, especially with regard to the structure and size of the image elements(claim 1 lines 1-23),

b) specifying the filter array geometry of a filter array, especially with regard to the structure and size of the filter elements(claim 1 lines 1-23),

c) specifying a spatial arrangement geometry in relation to the image generator and the filter array in a three-dimensional coordinate system (claim 1 lines 1-23)

d) specifying a first and a second monocular position of observation in front of the said arrangement geometry in the said three-dimensional coordinate system(claim 1 lines 1-23),

e) specifying a combined image that is suitable for display on the specified image generator geometry and that contains, in a defined assignment to the image elements, image information from different given primary images, which are identical to different views A_k ($k=1..n$) of a virtual or real scene or of a virtual or real object(claim 1 lines 1-23),

f) determining a first and a second secondary image containing image elements of the specified combined image which are visible to the eye of an observer in the specified first and second monocular positions of observation on the basis of the specified filter array geometry in conjunction with the specified image generator geometry and the spatial arrangement geometry, in which an image element of a secondary image may explicitly just as well represent only part of an image element of the specified combined image(claim 1 lines 1-23), and

g) stereoscopically visualizing the first and second secondary images or parts of these secondary images as a left and right stereoscopic image(claim 1 lines 1-23), respectively.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Said Broome whose telephone number is (571)272-2931. The examiner can normally be reached on M-F 8:30am-5pm.
